

# Custom Made Colors

## Unrivalled color match possibilities

We understand how important color is to you and your client, whether it's a specific corporate color required or a unique finish to complement surrounding design features.

To meet this need we offer a leading custom color match service capable of matching virtually every color from a variety of sources and produced to meet your desired performance specification. We offer unique textured sablé finishes, gold and silver metallics, pearlescents, matt, satin and gloss finishes to enhance the near endless color possibilities.

Due to our different product technologies color approval is subjected to a technical evaluation. [Contact us](#) to discuss your custom color requirements or view the custom capability showcase for both commercial architectural products.

## Require only a small quantity?

Occasionally the need arises for a particular color in a small batch. It could be that you want to highlight a particular design feature. It may be that you need a prototype to show your client. It could simply be that a small batch may be required for some custom built furniture or for a one-off side project in corporate colours.

Whatever the occasion Interpon can economically meet that need, fast.

**Interpon MiniB** and **Interpon MiniB *Micro*** are our exclusive and unique, made-to-order small batch services available across the complete range of Interpon products.

- Available in entire range of finishes in both custom and stock colors
- Accurate computer generated color matching
- Order sizes from just 20kg (coats approximately 140m<sup>2</sup>) with MiniB *Micro*
- Manufacture and deliver to your selected [Interpon D Approved Applicator](#) within 7 working days<sup>^</sup>.

<sup>^</sup>While every effort is made to manufacture and deliver within 7 working days, actual time may vary due to demand. Contact us for expected lead times. Delivery may be longer for Western Australia.
