ADV3003—As with all 3000 series, the 3002 uses our own 50mm diameter glazing posts and 60mm glazing rail for the top grab rail. The 3002 features a polished glass edge instead of a bottom rail. Other options with gaps to top rail and/or having a 60mm bottom rail are also available.

Shown here is tinted glass, one of the many glass options that can be used with all our balustrades to give that special effect needed for your important project.

The 3000 series when fitted into side fix brackets or epoxy fixed into concrete, utilises our strengthening spigot. This adds to the strength of the posts, ensuring compliance to codes, not all round posts are this strong.

ADV3005 is another option in our 3000 series. This one features 4 edge glazing.

4 Edge glazing gives the flexibility to use laminated glass as well as toughened glass, adding to the range of finishes in your palette, posts also spaced further.

Shown here is a laminated glass with a white interlayer giving privacy if required. We would always recommend glazing all edge when using laminated glass to reduce the incidence of delamination and discolouration.

Base plate fixing is another option for all our balustrades if needed
