

Color Ranges

Our commercial architectural color ranges have been designed specifically for the Australian architectural market taking influence from European trends, our global color knowledge and the preferences of Australian designers, architects and specifiers.

Interpon D2015 Ultriva Collection

This newly released commercial color collection aims to inspire with 4 distinct color ranges.

Featuring silver and gold flecked metallics, 3D effect 'sablé' textures and high gloss vibrant finishes, among other inspirational shades, the collection features a never before available mix of finish and color choices.

The collection features a 17 color stock range entitled *Contemporary Metro*, featuring our most popular neutral hues as well as 3 custom color ranges.
