email: sales@amia.com.au
showroom: 183 Orlando St,
Coffs Harbour

Specialist suppliers of aluminium sliding windows and doors, and now our flat packed balustrades.

Why purchase from Advance Metal Industries?

- We have a purpose made aluminium sliding window specifically designed to suit metal clad buildings.
- We offer fly and security screens to match our window and door range.
- We also offer powdercoated aluminium flat pack balustrades.
- We offer a complete range of windows and doors to suit all your customer requirements.
- Products are packed for ease of delivery to your customers.
- We use an Australia wide courier network, offering web based tracking.
- And most importantly, friendly and helpful assistance from our team.

What's special about Advance Metal Industries windows?

- Their design is a hybrid of our finned window with the aesthetic appeal of face fixed window.
- The windows external trim bead along the sill replaces the black PVC sill flap, and will hide any fixings externally, giving an excellent finished look.
- The trim bead has been designed to lock the window to the cladding, giving a great secure fit.
- The window can be installed in less time, saving on labour costs.
- The window eliminates the need for the provision of any flashings, a further saving.
- The window heights allow for "flat packing" in the steel packs of the future.
- All Colourbond colours are available (std range)
- Standard cladding profiles have been measured and our window widths have been worked out to suit the pans or valleys of standard sheet steel profiles.
- The standard window sizes are:

790 x 589mm	XO* 790 x 1274mm	XO 790 x 1731mm XO
790 x 816mm	XO 790 x 1505mm	XO Barn Window -Standard frame
*Denotes this will be offered in clear glass, obscure, obscure safety glass and obscure vented as options.		

What is web based delivery tracking?

We use fastways couriers, and there is a consignment note number for every delivery included on your invoice, simply go to the fastways site, enter the number and you can see exactly where the delivery is at.

Why the fuss about screens?

Screens are a good way to value add to your sale. Tell your customers that the screens will be cheaper to buy now, with the windows, than getting them shipped out at a later date.

Introducing Advance Metal Industries balustrades?

- The balustrades are available in a number of infill styles, and the whole lot come flat packed to you.
- Full installation instructions accompany the pack, making installation easy.
- To calculate the price for the balustrade, we have developed a simple spreadsheet program that can be emailed to you and is easy to use.
