

# Product Selector

We know that not everyone is as interested in powder coatings as us, or aware of the detailed specifications related to our industry. That's why, as the powder specialists, we want to make the selection process of our coatings as simple as possible.

We have created the Interpon product selector tool to help you choose the right coating, first time. If you are ready to write your specification, skip to our [specification writing tool](#).

## Question 1:

Will the powder coated substrate be located internally or externally?

- Internal
- External

## Question 2

What project type will the powder coated substrate be a part of?

- Class  
1 or 10 of  
the BCA  
2010 [\[?\]](#)
- Class  
2-9 of the  
BCA 2010  
[\[?\]](#)

## Question 3

To determine the level of corrosion protection required choose the environment in which the powder coated product will be located. The listed environment categories are based on the Atmospheric Corrosivity Categories as stated in AS2312.

- Interior A - Very Low [\[?\]](#)
- Interior C - Medium [\[?\]](#)
- Interior D - High [\[?\]](#)
- Exterior B - Low [\[?\]](#)
- Exterior C - Medium [\[?\]](#)

- Exterior D - High [\[?\]](#)
- Exterior E - Very High [\[?\]](#)

#### **Question 4**

What durability performance is required?

- Ultra Durability [\[?\]](#)
- Premium Durability [\[?\]](#)
