### Let the AMIA 246 Series Sliding Door be your gateway to the great outdoors.

Smart styling, dependable hardware and a range of designs all combine to offer you a 'premium' sliding door. An extensive choice of configurations allows you to maximise your opening space, access and ventilation.

For that something different, corner and cavity-concealed configurations are also possible. All aspects of the 246 Series sliding door bear the inherent qualities and refinements gained from AMIA's extensive history of manufacturing, NATA certified testing and site experience.

### Features

*Photo courtesy of Sorensen & Caldon Builders (Taree)*

- Flat-top sill ideal for a flush 'inside-to-outside' transition (when recessed into rebated flooring)
- Deep draining sill section, profile-cut corner gaskets and brush seals combine for excellent weather resistance
- Colour matching, ribbed thresholds provide a neat, flush finish to the top (head) and bottom (sill) tracks
- Three and five track (frame) options allow for multiple sliding/fixed panel configurations (see below pages for further details)
- Height adjustable, non-corrosive ball bearing rollers for long term performance and a smooth sliding action.
- Fly, barrier and Crimsafe screening options
- 7 year 'peace of mind' guarantee  
(Terms and conditions apply)

### Example Configurations

*See end of brochure for standard size range and configurations.*

### Screens

#### Flyscreens

AMIA flyscreens are a practical and economical method to cover the open area of your windows and doors, helping to keep your home free from flies. Our flyscreens are constructed using an extruded aluminium frame and standard fibreglass mesh.

#### Barrier Screens

Barrier screens offer an affordable, intermediate level of security for your home. AMIA's barrier screens feature black Armagril (diamond-shaped, aluminium grille), fibreglass mesh and aluminium frame.

#### Ultrsafe Screens

Ultrsafe screens provide a superior level of safety and security to your windows and doors. The integral high-tensile, stainless steel mesh is discrete in appearance ensuring your views are unhindered.

### Technical Data

<b>Max. Height<sup>1</sup></b>	2400mm
<b>Max. Door Panel Width<sup>1</sup></b>	1200mm
<b>Max. Glass Thickness</b>	<ul style="list-style-type: none"> <li>• Single glaze – 6.76mm</li> <li>• Double glazed (IGU) – 18mm</li> </ul>
<b>Max. Water Performance</b>	<ul style="list-style-type: none"> <li>• Standard Sill – 300 Pa</li> <li>• Sub-sill Configuration – 450 Pa</li> </ul>
<b>Perimeter Frame Width Options</b>	<ul style="list-style-type: none"> <li>• 3 Track – 100mm</li> <li>• 5 Track – 168mm</li> </ul>
<b>WERS Data<sup>2</sup></b>	<ul style="list-style-type: none"> <li>• U-Value range: 4.60 – 6.50</li> <li>• SHGC range: 0.31 – 0.73</li> </ul>
<b>Acoustics<sup>2</sup></b>	Up to Rw 35
<b>Bushfire Attack Level</b>	Tested and certified to BAL-40
<b>Fixing Types</b>	Fin fix and face fix
<b>Compatible Construction Types:</b>	Brick veneer, clad wall, block wall, cavity brick and modular/portable
<b>Air Infiltration:</b>	This window conforms with AS2047 air infiltration requirements for air-conditioned buildings

<sup>1</sup> Maximum sizes are a guide only and subject to the wind rating or SLS/ULS requirements of the site.

<sup>2</sup> Consult your AMIA representative to determine the most suitable product configuration for your requirements

### IMPORTANT

#### Don't let the opportunity pass to consider your glass options.

When specifying the windows and doors for your home, you'll make decisions in relation to ventilation, light, aesthetics and operation – all very relevant considerations. There is however another equally important consideration that is often overlooked, and that is the type of GLASS you choose. The selection of a 'performance' glass can address such issues as heat gain, energy efficiency, security, noise and glare reduction – all of which are central to your comfort and the overall liveability of your home.
